Name of Student *

AMEY MAHENDRA THAKUR

Roll no *

50

✓ 1]-------is not a grid computing system layer. *   1/1

◯ Resource layer

◯ Fabric layer

◯ Connectivity layer

◉ Datalink layer   ✓

✓ 2]Which of the following is not correct for an open distributed system *   1/1

◉ It should not be extinsible   ✓

○ It should configure system out of different components from different developers

○ it offers services according to standard rules that describes syntax and semantics of those services

○ It should be easy to add new components or replace the existing ones witout affecting the system

✓ 3]Which of the following is not correct regarding distributed   1/1
systemABCD *

◉ differences between the various computers and the ways in which they   ✓
communicate are mostly known to all users

○ The first one is that a distributed system consists of components that are autonomous

○ users think they are dealing with a single system

○ A distributed system is a collection of independent computers that appears to its users as a single coherent system

✓ 4]READ and WRITE are ---------------- for transactions in Transaction   1/1
Processing Systems *

○ Features

◉ Primitives   ✓

○ Goals

○ Characteristics

✓ 5]which of the following is not true for the wireless sensor networks *   1/1

⦿ It is a type of distributed Information system   ✓

○ Nodes are equipped with sensing devices

○ Instability is its default behaviour

○ Nodes are battery powered

✓ 6]-------------use randomized algorithms for constructing an overlay   1/1
network.ABCD *

○ Database Management Systems

○ Data Designing Systems

○ Distributed Systems

⦿ Unstructured peer-to-peer systems   ✓

✓ 7]In distributed system each processor has its own *   1/1

○ local memory

○ clock

⦿ both (a) and (b)   ✓

○ none of the mentioned

✓ 8]If one site fails in distributed system *   1/1

◉ The remaining sites can continue operating   ✓

○ all the sites will stop working

○ directly connected sites will stop working

○ none of the mentioned

✓ 9]Network operating system runs on *   1/1

◉ server   ✓

○ every system in the network

○ both (a) and (b)

○ none of the mentioned

✓ 10]In distributed systems, link and site failure is detected by *   1/1

○ polling

◉ handshaking   ✓

○ token passing

○ none of the mentioned
